Q7. Below is a list of statements that some people cite to make the case that to legalise assisted suicide or euthanasia would be a mistake. How persuasive or otherwise would you say that each of the statements are in supporting the argument that to legalise this practice would be a mistake?

Summary Table**Base: All respondents**

	Statements							
	In every country where euthanasia or assisted suicide has been legalised, the categories of people eligible for it have expanded, as have the number of people dying by this method. ...	In Canada, euthanasia ended the lives of at least 686 disabled people, most of whom probably had years of life left	In the Netherlands, at least nine people with autism, and perhaps many more, have requested and received a lethal injection because they found it too difficult to make social ...	In Belgium and the Netherlands, some young people are killed by euthanasia because they have mental illnesses the young person believes is incurable	There are fears that legalised euthanasia and/or assisted suicide would be used to save money. A report from Canada is for example, estimates that savings from killing almost ...	In proposed Scottish legislation, a person is deemed 'terminally ill' if they have 'an advanced and progressive disease, illness or condition from which they are unable to ...	There is evidence from other countries of pressure for people to opt for assisted suicide and euthanasia because they feel they are a burden. Here, Times commentator Matthew ...	Suicide (unassisted/ violent suicide) rates have either stayed the same or increased in places where assisted suicide has been legalised

Q7. Below is a list of statements that some people cite to make the case that to legalise assisted suicide or euthanasia would be a mistake. How persuasive or otherwise would you say that each of the statements are in supporting the argument that to legalise this practice would be a mistake?

In every country where euthanasia or assisted suicide has been legalised, the categories of people eligible for it have expanded, as have the number of people dying by this method. For example in the US state of Oregon, that number increased by 260% from 2012 to 2022

Table 22

Q7. Below is a list of statements that some people cite to make the case that to legalise assisted suicide or euthanasia would be a mistake. How persuasive or otherwise would you say that each of the statements are in supporting the argument that to legalise this practice would be a mistake?

In every country where euthanasia or assisted suicide has been legalised, the categories of people eligible for it have expanded, as have the number of people dying by this method.

For example in the US state of Oregon, that number increased by 260% from 2012 to 2022

Base: All respondents

Q7. Below is a list of statements that some people cite to make the case that to legalise assisted suicide or euthanasia would be a mistake. How persuasive or otherwise would you say that each of the statements are in supporting the argument that to legalise this practice would be a mistake?

In the Netherlands, at least nine people with autism, and perhaps many more, have requested and received a lethal injection because they found it too difficult to make social contacts

Base: All respondents

Q7. Below is a list of statements that some people cite to make the case that to legalise assisted suicide or euthanasia would be a mistake. How persuasive or otherwise would you say that each of the statements are in supporting the argument that to legalise this practice would be a mistake?

There are fears that legalised euthanasia and/or assisted suicide would be used to save money. A report from Canada is for example, estimates that savings from killing almost 45,000 people has been around \$604m

Q7. Below is a list of statements that some people cite to make the case that to legalise assisted suicide or euthanasia would be a mistake. How persuasive or otherwise would you say that each of the statements are in supporting the argument that to legalise this practice would be a mistake?

There are fears that legalised euthanasia and/or assisted suicide would be used to save money. A report from Canada is for example, estimates that savings from killing almost 45,000 people has been around \$604m

Base: All respondents

Q7. Below is a list of statements that some people cite to make the case that to legalise assisted suicide or euthanasia would be a mistake. How persuasive or otherwise would you say that each of the statements are in supporting the argument that to legalise this practice would be a mistake?
In proposed Scottish legislation, a person is deemed 'terminally ill' if they have 'an advanced and progressive disease, illness or condition from which they are unable to recover and that can reasonably be expected to cause their premature death. There is no prognosis of death required. This definition can include Type 1 diabetes, rheumatoid arthritis and other illnesses people routinely live with, sometimes for years. It could also include refusal of treatment which will lead to death, such as in cases of teenagers aged 16 or 17 with anorexia nervosa

Q7. Below is a list of statements that some people cite to make the case that to legalise assisted suicide or euthanasia would be a mistake. How persuasive or otherwise would you say that each of the statements are in supporting the argument that to legalise this practice would be a mistake?

There is evidence from other countries of pressure for people to opt for assisted suicide and euthanasia because they feel they are a burden. Here, Times commentator Matthew Parris, ... among others, believes that "social and cultural pressure will grow on the terminally ill to hasten their own death so as 'not to be a burden' on others or themselves... and I would welcome it." Every survey of people who choose euthanasia or assisted suicide where it is legal finds that fear of 'being a burden on loved ones' is one of the main reasons for choosing it

Table 34

Q7. Below is a list of statements that some people cite to make the case that to legalise assisted suicide or euthanasia would be a mistake. How persuasive or otherwise would you say that each of the statements are in supporting the argument that to legalise this practice would be a mistake?

There is evidence from other countries of pressure for people to opt for assisted suicide and euthanasia because they feel they are a burden. Here, Times commentator Matthew Parris, ... among others, believes that "social and cultural pressure will grow on the terminally ill to hasten their own death so as 'not to be a burden' on others or themselves... and I would welcome it." Every survey of people who choose euthanasia or assisted suicide where it is legal finds that fear of 'being a burden on loved ones' is one of the main reasons for choosing it

Q8. Do you agree or disagree with each of these statements about assisted suicide and its possible impact?

Summary Table

Base: All respondents

	Statements											
	In certain circumstances, the terminally ill should be encouraged to end their lives prematurely in order to prevent them being a burden.	In certain circumstances, the elderly should be encouraged to end their lives prematurely in order to prevent them being a burden.	Anyone who wants to die should have the right to help to do so.	I support legalising the principle behind assisted suicide but feel there are too many complicating factors to make it a practical and safe option to implement in Britain.	In countries like Canada and the Netherlands, where young people with no terminal illness are helped to die, the law has gone too far in allowing euthanasia.	It is right to give euthanasia to people with autism if they have persistent problems integrating into society, find it difficult to make friends, and consistently ask for it.	Giving GPs the power to help patients commit suicide would fundamentally change the relationship between a doctor and patient, since GPs currently protect and preserve the ...	Legalising assisted suicide could well lead to a culture where committing suicide becomes more normalised than it is today.	Introducing assisted suicide when the NHS is under such pressure would inevitably risk funding for palliative care services.	Introducing assisted suicide when the NHS and Social Care budget is under such pressure would inevitably place an incentive on health professionals to encourage some	If assisted euthanasia are ever introduced in Britain, doctors and hospices should have a legal right to opt out of participating in it.	If assisted suicide or euthanasia are ever introduced in Britain, patients should have a legal right to be treated by doctors and other health professionals who have opted

Table 44

Q8. Do you agree or disagree with each of these statements about assisted suicide and its possible impact?

I support legalising the principle behind assisted suicide but feel there are too many complicating factors to make it a practical and safe option to implement in Britain.

Base: All respondents

Table 45

Q8. Do you agree or disagree with each of these statements about assisted suicide and its possible impact?

I support legalising the principle behind assisted suicide but feel there are too many complicating factors to make it a practical and safe option to implement in Britain.

Base: All respondents

	Total	Voting Intention										2019 Vote							Seriously ill Yes (r) No/ Dont know (s)	Legalising assisted suicide			Legalising euthanasia

Table 49

Q8. Do you agree or disagree with each of these statements about assisted suicide and its possible impact?

It is right to give euthanasia to people with autism if they have persistent problems integrating into society, find it difficult to make friends, and consistently ask for it.

Base: All respondents

Q8. Do you agree or disagree with each of these statements about assisted suicide and its possible impact?
Legalising assisted suicide could well lead to a culture where committing suicide becomes more normalised than it is today.

Base: All respondents

Table 56

Q8. Do you agree or disagree with each of these statements about assisted suicide and its possible impact?

Introducing assisted suicide when the NHS and Social Care budget is under such pressure would inevitably place an incentive on health professionals to encourage some people to end their lives early.
